BUY THE SEMEN

NO ORDINARY BULLS

Welcome to our new catalogue designed to combine with our recently built website to allow pedigree and commercial breeders access to the best British and Belgian Blue Genetics.

No one knows British Blue pedigrees like we do. Norbreck Genetics combines British, Belgian and Dutch business partners to bring you only the genetics suitable for UK breeders.

Norbreck Genetics offer a varied selection of British/Belgian bulls, but all are genetically tested for semen defects. Either ourselves or our business partners have seen the progeny sires and dams involved in the

pedigree make up. Our unique selling point is the ability to talk to pedigree and commercial cattle breeders, listen to their requirements and recommend a corrective mating option.

The results speak for themselves. Daffyd D'Ochain, Empire D'Ochain are firmly logged in the Belgian Blue hall of fame and others are joining them.

Our promise to you is a dedicated team who will deliver semen wherever your farm is situated and give unbiased advice to anyone who calls for a chat. You can order semen from a company that cares about the next generation of cattle on your farm.
